Jump back to the 1960's (Well almost). The Retro is electric and legal for over 14's yet has the classic lines of the Scooters from the heydays of the Mods. This is one fashion statement that also speaks volumes for the environment.

Totally redesigned, the Retro has a removable battery for convenient charging which can also be charged in situ. With its built in alarm and wheel lock you also know your bike will be safe. For legal reasons there is a speed limiter which can be overridden for off-road use.
